

Erbisloeh Aluminum
Solutions, Inc.

Automotive Industry Capabilities

Erbisloeh Aluminum Solutions is the single source for Class-A, fully-finished automotive trim and components.

Current specification and design trends all point to extruded aluminum as the ideal material – for now and for tomorrow. Consumer and industrial products that require trim or other elements that are lighter weight, easy to maintain, don't show fingerprints, or gleam with attractive bright colors, are all an essential part of many of today's functional and eye-catching products.

Erbisloeh Aluminum Solutions can engineer, extrude, finish/ anodize, fabricate and assemble your parts with the same level of quality that makes us the first choice for some of the world's top manufacturing brands.

To learn more about how Erbisloeh Aluminum Solutions can work with you and your team to increase visual appeal and manufacturing efficiencies, contact us today.

- Engineering
- Extrusion
- Fabrication
- Finishing
 - Polishing
 - Brushing
